

## Folding Machine FA21/4 S2 SVA/730

A folder for Pharmaceutical Leaflets  
10,000 machines successfully installed worldwide

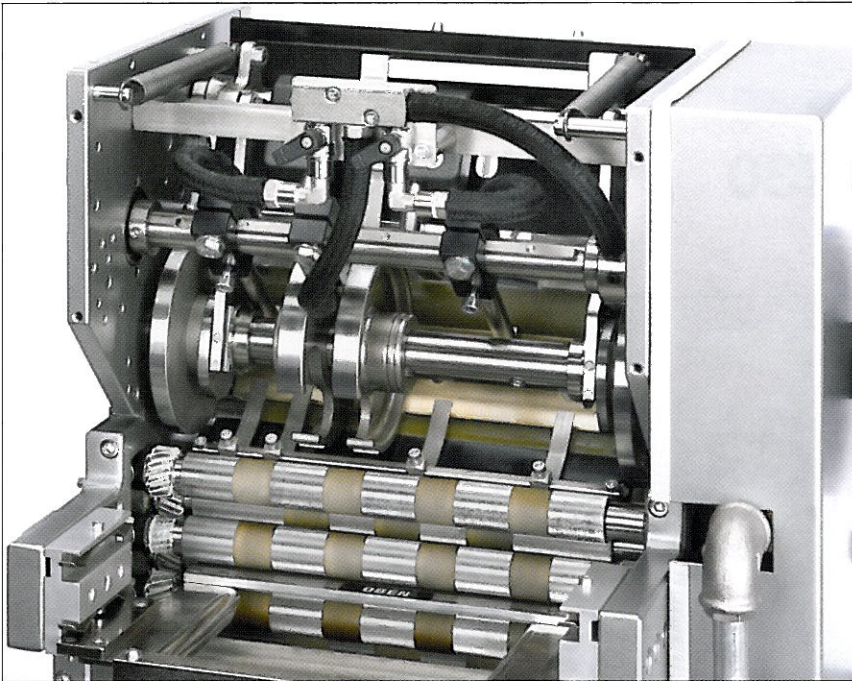

## Operational Areas and Function

This folder is mainly suitable for the folding of leaflets for the cosmetics, toiletry and pharmaceutical industries. The essence of the machine is the approved leaflet

folder type FA 21, which is installed on cartoning machines. Also attached are a base and a drive mechanism.

Numerous accessories are available, the main one being the excellent ability of double sided bar code reading.

## Reliable Draw-Off System

## Technical Data

High Capacity Automatic Folding Machine is maintenance-free and has a low noise level design. The folding mechanism runs on needle bearings. It is adaptable to fit additional sections to enable variable formats of folding. Massive construction. Minimum floor space requirement. Single person operation.

The leaflets are drawn-off by drums and adjustable suction nozzles. The sheet is folded by the plate mechanism with 4 or 6 plates. Additional cross folding can be done by adapting a knife folding unit.

## Technical Data

<b>Infeed width:</b>	max. 21 cm min. 6 cm
<b>Infeed length:</b>	max. 32 cm, (special design 45 cm, 57.5 cm or 65 cm) min. 10.5 cm; in special design 6.8 cm
<b>Output:</b>	Up to 24,000 sheets/hour without ejection device Up to 18,000 sheets/hour with ejection device
<b>Paper quality:</b>	30 – 180 g/m <sup>2</sup>
<b>Floor area required:</b>	82 x 75 cm
<b>Power requirement:</b>	1.6 kW

## Accessories and different models

FA 21/4 S2 SVA/730 with 4 folding plates	Bar code reader for one or two sides
FA 21/6 S2 SVA/730 with 6 folding plates	Ejection device for incorrect leaflets
	Vertical stacker KS 235
	Chute delivery S 350
	Knife folding unit EK 300
