

Cutting Machine

SM54 SM74

SM54/4 SM74/4

Cutting Machine with alignment table, mobile and adjustable in height.

Various designs:

SM54 and SM74 with 1 pair of knife shafts

SM54/4 and SM74/4 with 4 pairs of knife shafts

For connection with mailing systems, folding mechanisms and machines of other suppliers.

Functions

The cutting machines are equipped with 1 to 4 pairs of knife shafts, depending on the type. With the SM54/4 respectively SM74/4 several manufacturing operations can be made in only one procedure.

For example hot glue rubbering, impulse cutting, pressure perforation, separating cutting, edge cutting, strip cutting, hot glueing or cold glueing.

The machine has an independent motor drive, is mobile and equipped with a hydraulically adjustable base in order to match the in-feed height.

Technical features

- Massive construction
- Plug-in type knife shafts
- Roller adjusting automatics by means of paper strips
- Synchronous drive by hardened, side-grinded and spiral toothed gears
- Maintenance-free bearings
- To be used also on machines of other suppliers

Technical data

Infeed width:	For SM54: max. 540 mm min. 150 mm
	For SM74: max. 740 mm min. 150 mm
Infeed length:	For SM54 and SM74: max. 800 mm min. 210 mm
Infeed height:	For SM54 and SM74: max. 865 mm min. 590 mm
Output:	30–200 m/min. infinitely variable
Power consumption:	1.5 KW

Installation plan
